

EASTERN

REDI, SET, GO

REDI-PULL[®]

REDI-PULL is a *unique, cost effective* service which bundles customer supplied wire & cable into a single cross lashed cable assembly. **REDI-PULL** eliminates the need for “multi-spool cable pull set-ups”. **REDI-PULL**'s unique reverse oscillated design and distinctive cross lash binding allows for *easy pulling*, particularly around bends. **REDI-PULL** accommodates 3 to 50 conductors in a single bundle up to 2” diameter.

REDI-MARK[®]

REDI-MARK is a complementary cable marking service which *eliminates* the time and effort required to field install wire markers. **REDI-MARK** provides accurate, error free tagging. Distinctive numerical markings are printed every 2 inches in alternating directions.

REDI-PULL[®] and **REDI-MARK[®]** can be combined with Eastern's cable armoring and jacketing services to further improve cable installation efficiency.

STANDARD CODE REQUIREMENTS

CONDUCTOR		Maximum Number of Conductors of One Size in Trade Size Conduit					
TYPE	SIZE AWG Kcmil	3/8"	1/2"	3/4"	1"	1 1/2"	2"
THHN	14	3	13	22	33	76	134
	12	2	9	16	24	56	98
	10	1	6	10	15	35	62
	8	-	3	6	9	20	35
	6	-	2	4	6	14	25

Typical Applications:

- * Elevators
- * Conveyors
- * OEMs
- * Equipment Builders
- * Repetitive Cable Pulls i.e. data, power, control/instrumentation

- * **Composite Cable Design** - when combined with Eastern's CPID service (custom armoring & jacketing service.)
